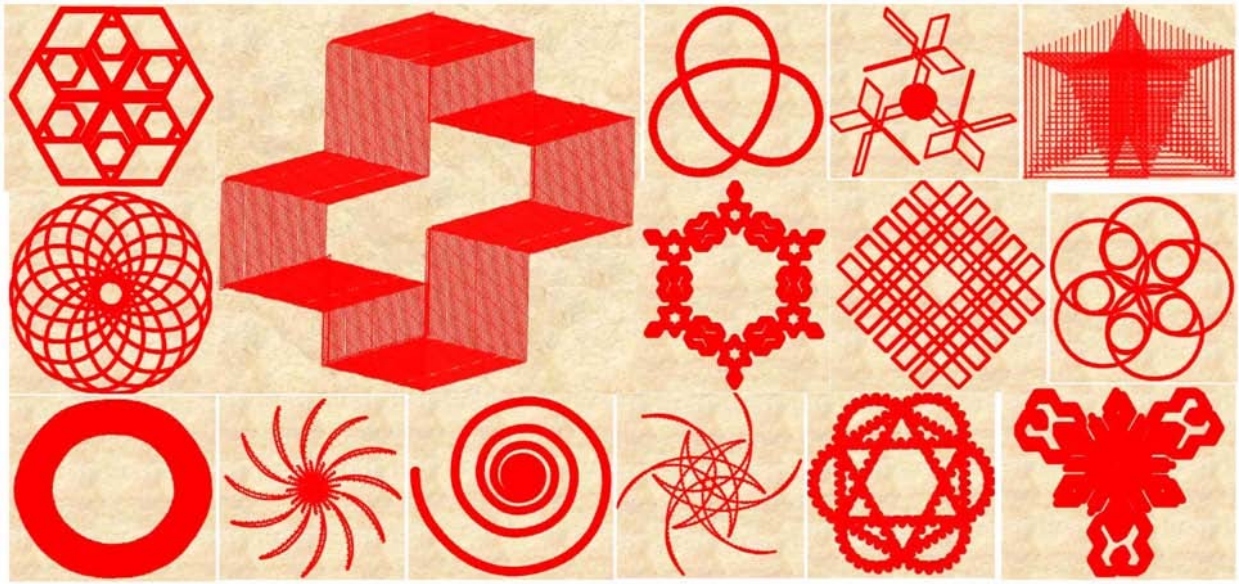
CROP CIRCLES.

“Crop circles” - a phenomenon, about which was written many articles and books, and popular theme of Web sites and of other media's.
The media has very successfully are creating the opinion, that all of “Crop circles” are the result of hoaxes (human jokes - pranks with planks, with laser, with GPS equipments), or are the result of action of extraterrestrials, or electromagnetic irradiation plants, which are creating UFO and other, unidentified (fantastical) objects.
This opinion media is grounded by that academic science does not wish or incapable explain complexity images of “Crop circles” using only laws of nature.
In a difference from this was proved that the natural “Crop circles” occur during the formation of cracks at porous rock, over which there is a field with plants http://nyos.lv/en/krugi-na-poljah/fizika-steblevogo--poleganija-rastenij-v-krugah-na-poljah-30643 .
Formation of cracks at porous rock creates electromagnetic and acoustic (including infrasonic) radiation in soil and in a atmosphere.
The electromagnetic and acoustic radiations have an impact on all biological and UFO objects that are in the area of “Crop circles”.
In the area of the "Crop circles", the people under the influence of electromagnetic and infrasonic radiation, may feel malaise, headache, dizziness, nausea, anxiety, weakness and visions, caused by a hallucination.
The influence of electromagnetic radiation in the zone of the picture "Crop circles" on animals is manifested in the change of motor activity of animal, in an aspiration to leave this area.
Moreover, was explained Anomalous Expansion of Nodes of stalks plants in the “Crop circles” and theoretically were proved the possibility creations very complex images of natural “Crop circles” http://nyos.lv/en/krugi-na-poljah/anomaljnoe---rasshirenie--uzlov-rastenij-30644 .



Crop Circles: Images on the earthly surface, that can create instantaneously arising up cracks in porous rocks in earthly depths.
